

Digital Flow Meter 0.05~1.0L/Min 8mm OD fittings

Digital flow meter for De-Bubbler 265 calibration, with programmable volume and time periods. Measures flow rate and total volume of water. Suitable for use with water. 0.05~1.0 litres per minute, 8mm OD fittings.

Digital volume totalizer and flow meter with LCD display, suitable for water systems with a very low flow rate, 0.05 to 1.0 Litres per minute, the meter is fitted with 8mm OD push fit connections and a 1.5 meter cable between the monitor and sensor.

This meter is a count up meter, so it will tell you the volume of water that has passed through the meter since installation (or since resetting the meter), as well as displaying the live flow rate.

The meter is simple to use and comes with comprehensive instructions. It is suitable for water dispensers, water filters, aquatic filtration systems and other low flow water systems.

Technical Specifications

- Elapse time monitor, from 30 to 720 days
- Flow rate display, 0.05 - 1L/min
- Cable length: 150 cm
- Battery operated, 2 AA batteries (not included)
- Low battery power alert
- Automatic data memory
